IS240: System Analysis and Design
1st Semester 1447 H

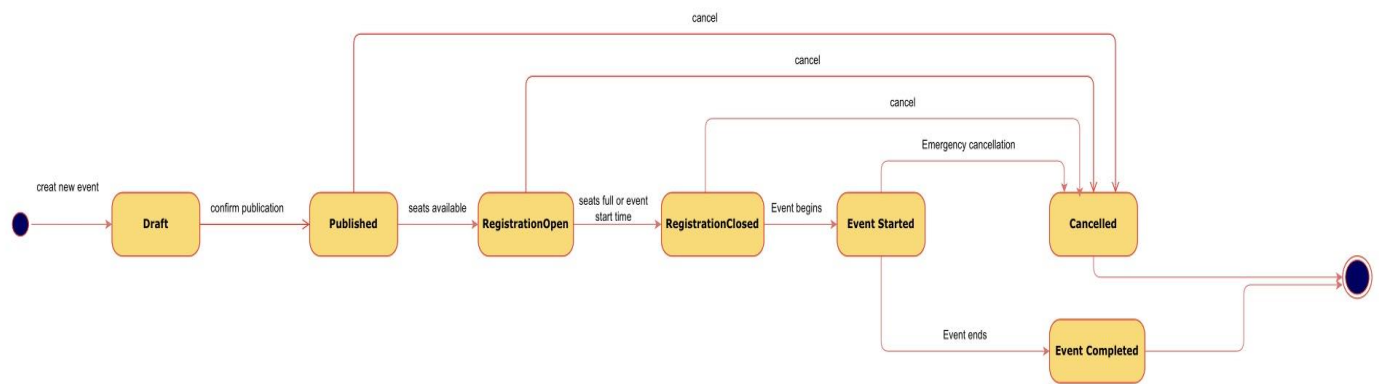

7	<i>Layal Alfawzan</i>
26	<i>Jumanah Ibrahim</i>
27	<i>Ghadah Alajlan</i>
25	<i>Shaima kassim</i>
4	<i>Hana Aldawoud</i>

Supervised By: *Bodoor Alfares.*

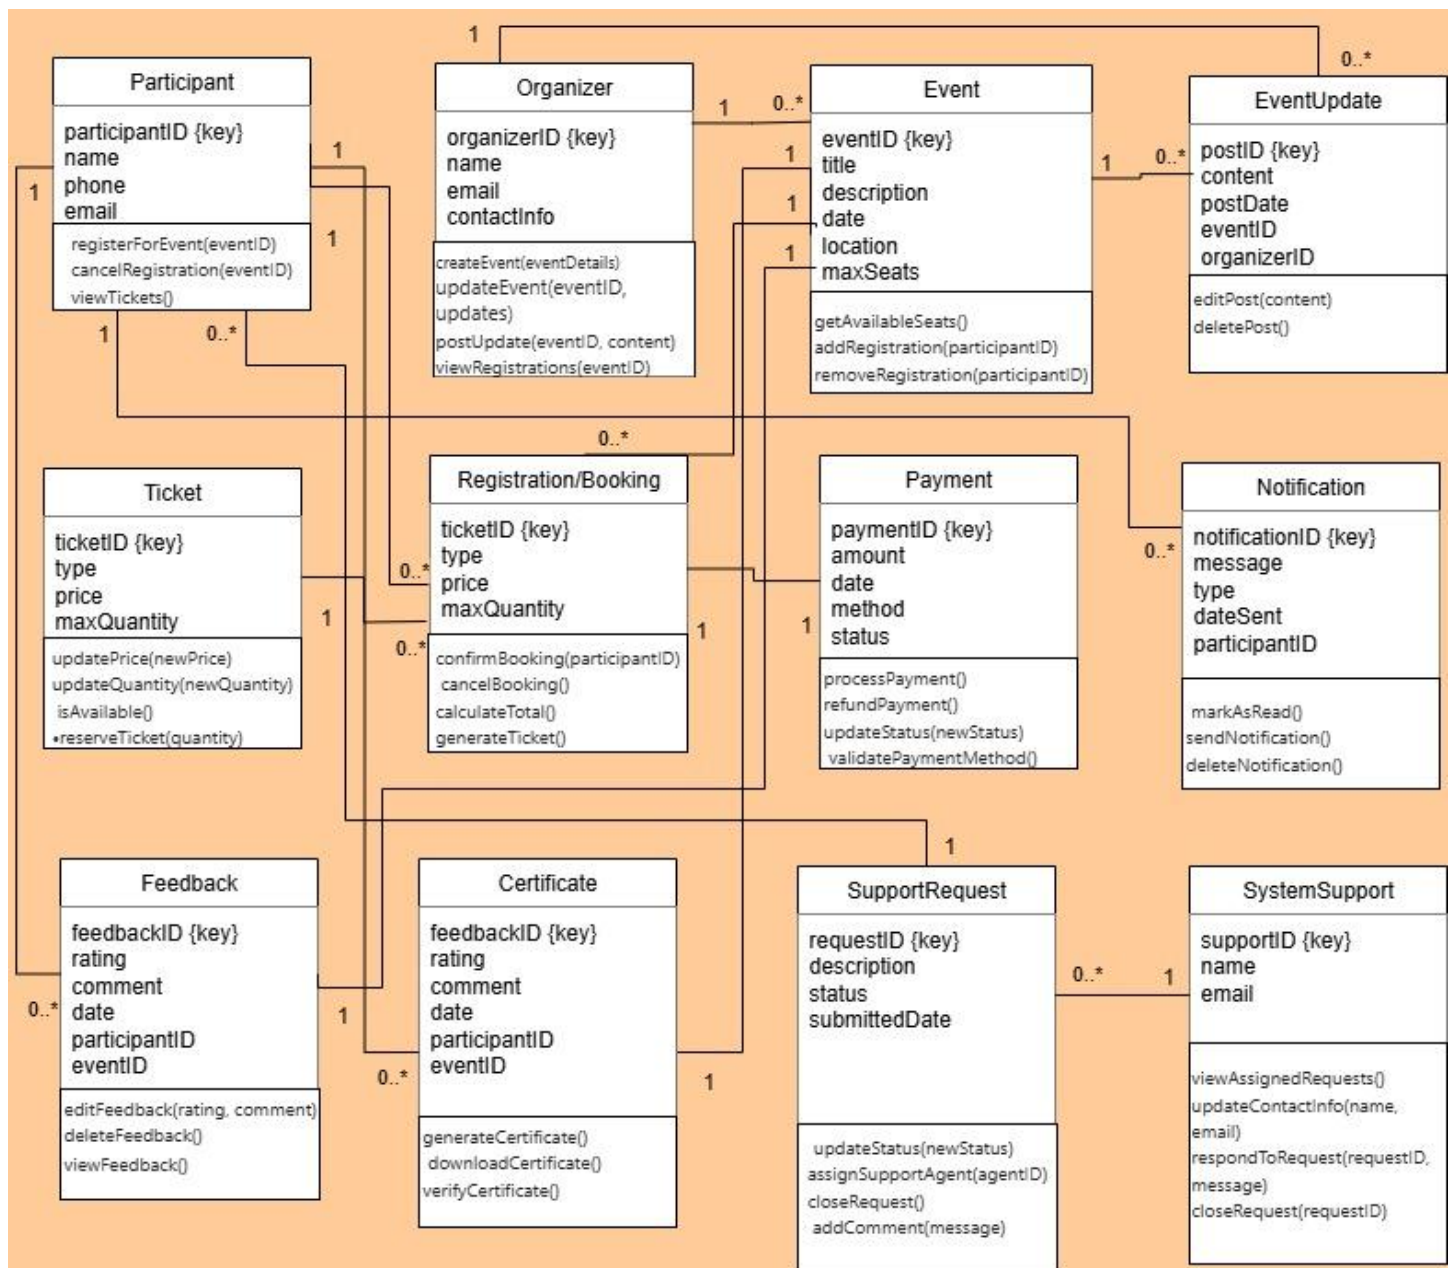

First Semester 1447

Oct 2025

3.6 state machine diagram

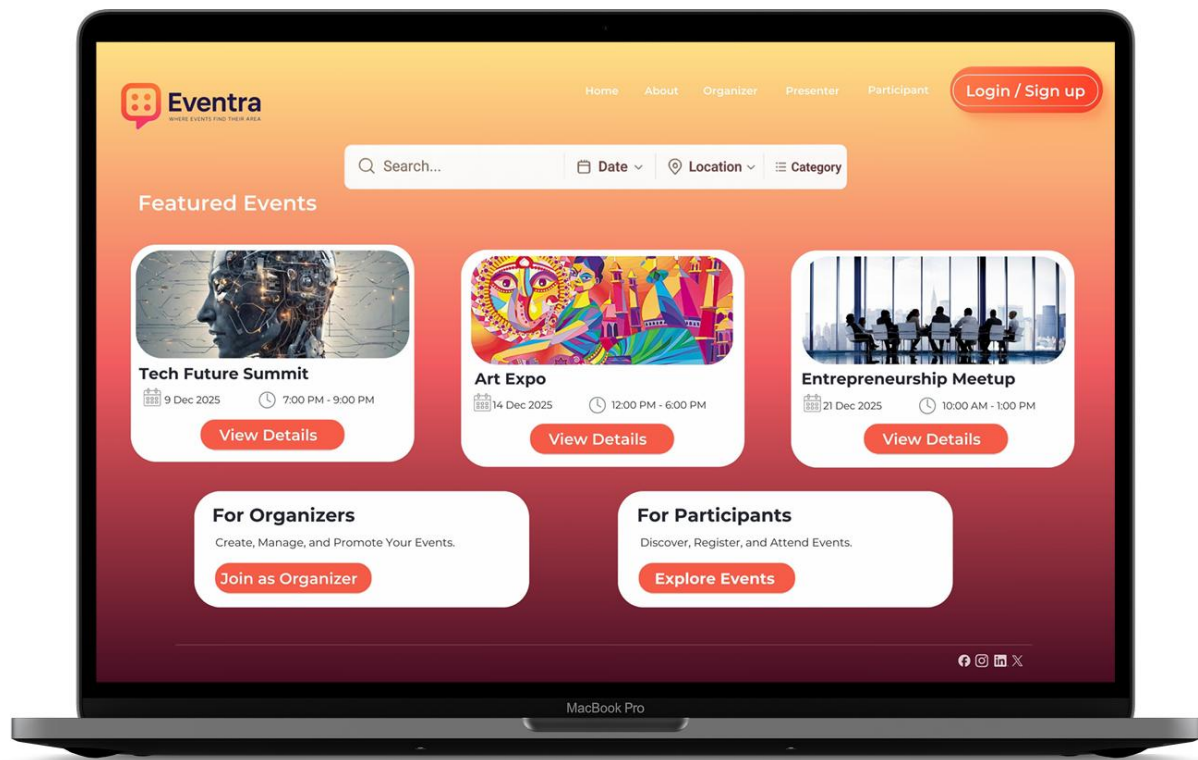

3.7 Design class diagram

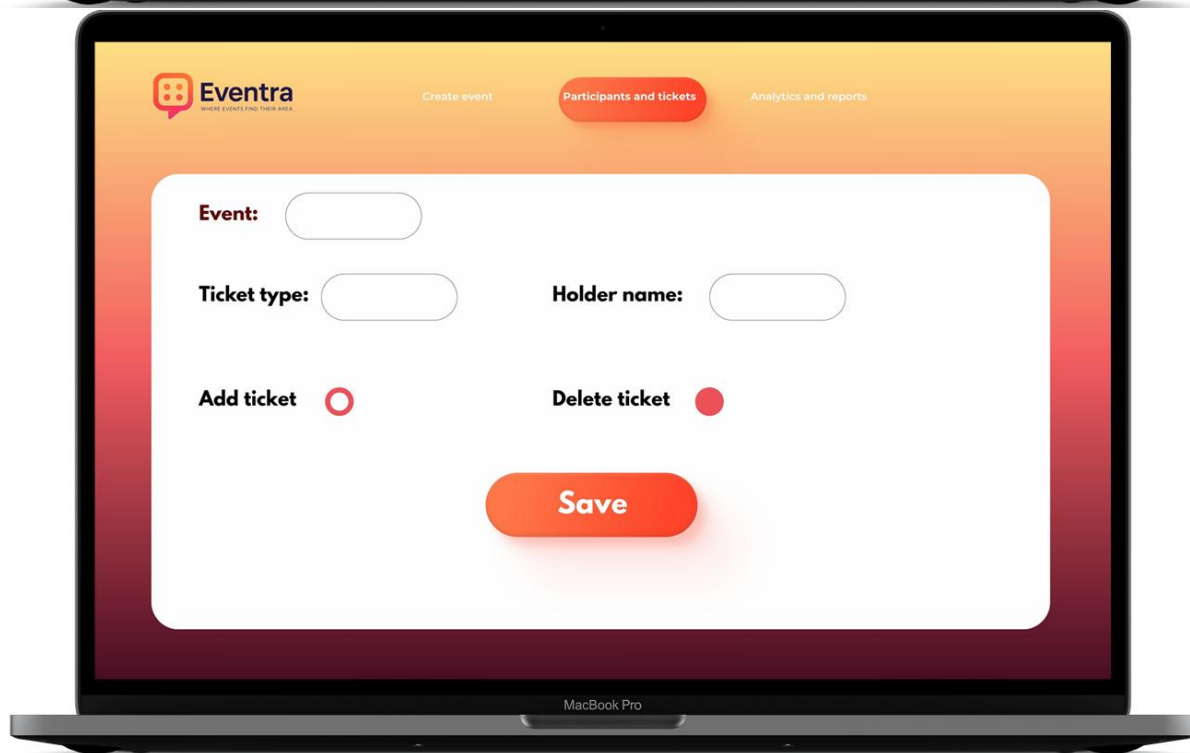

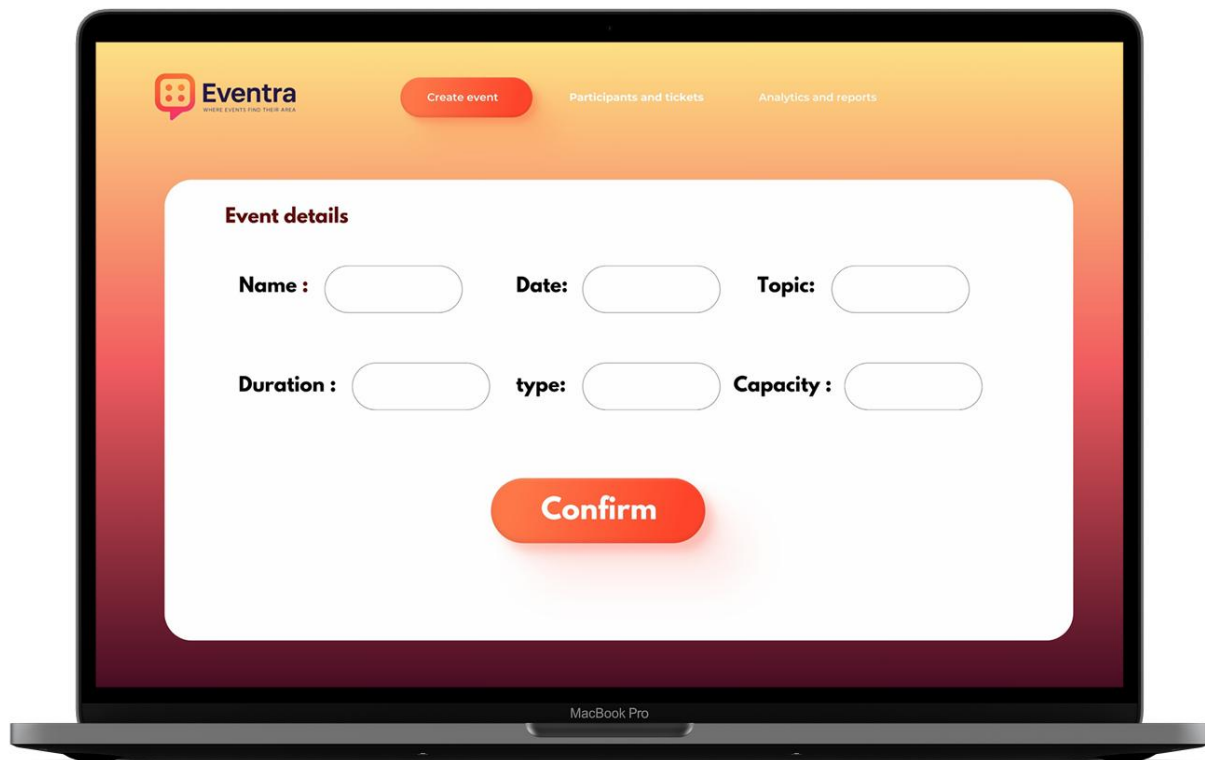

3.8 User interface

Home screen

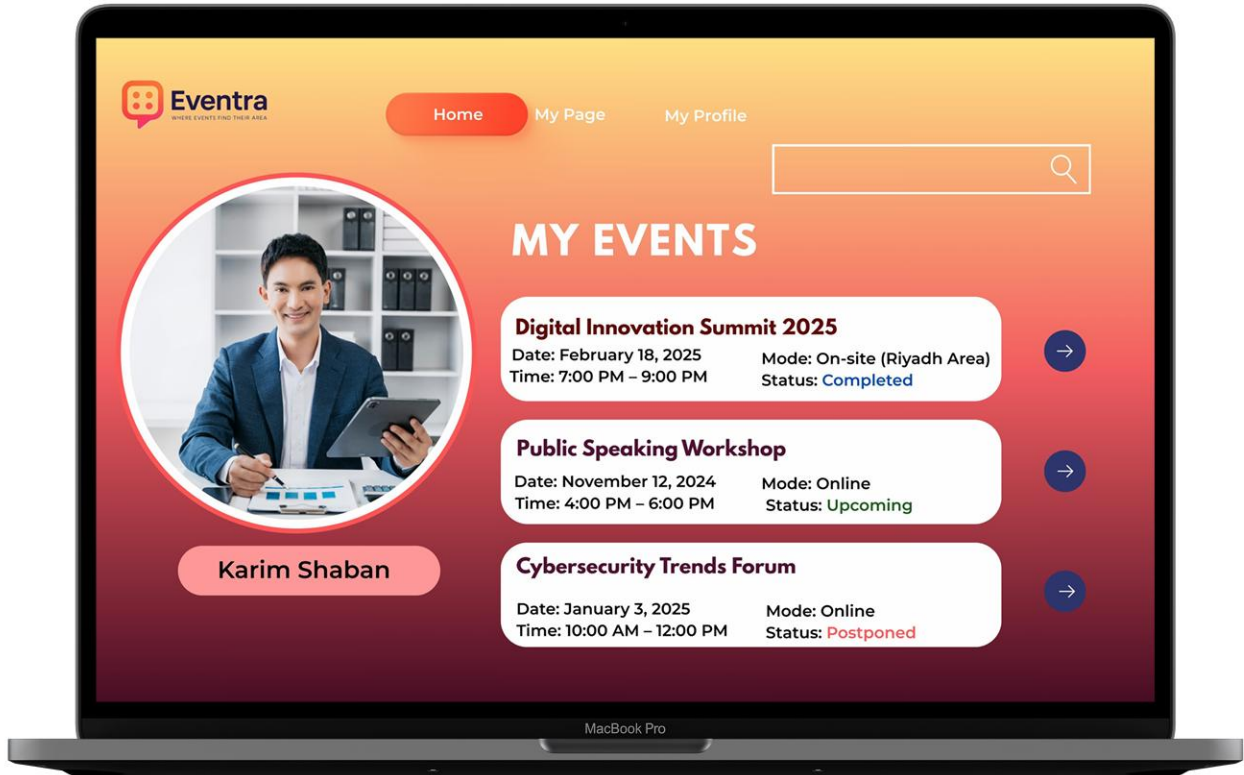

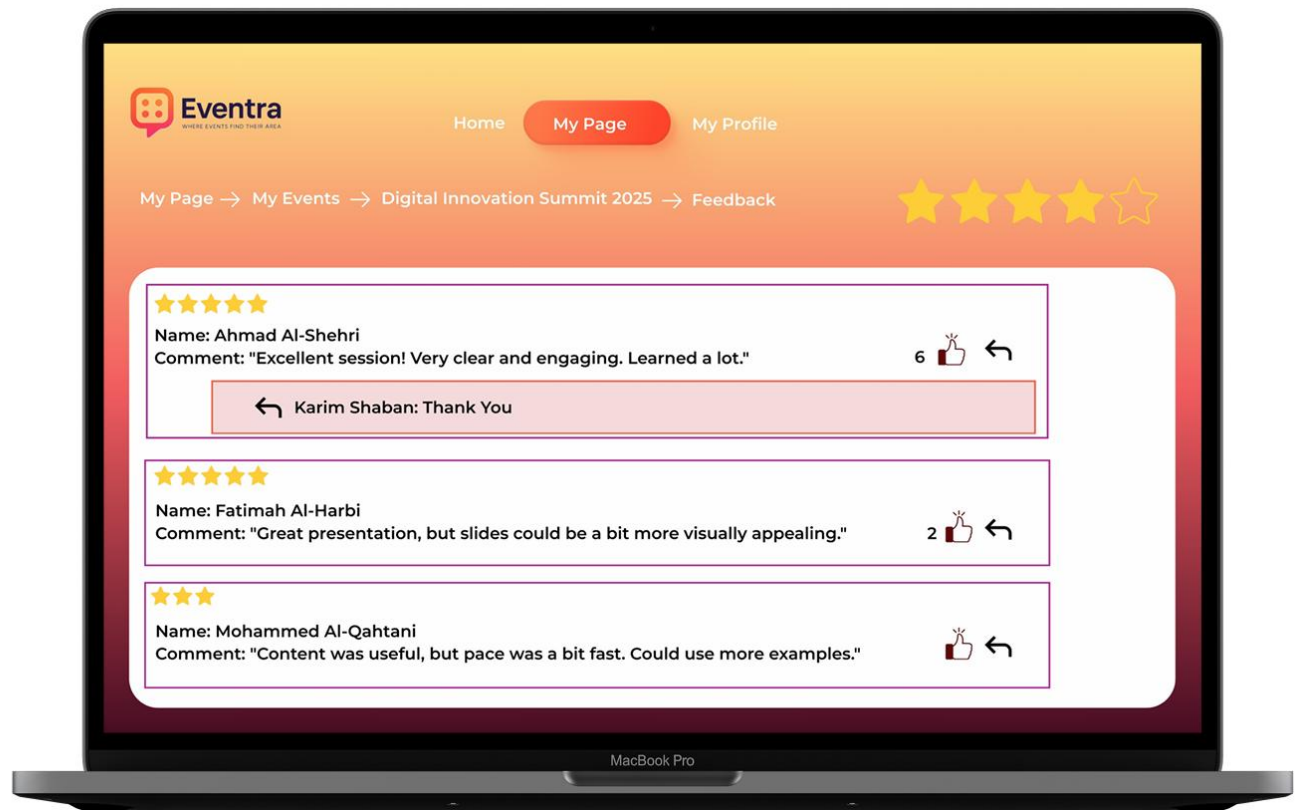

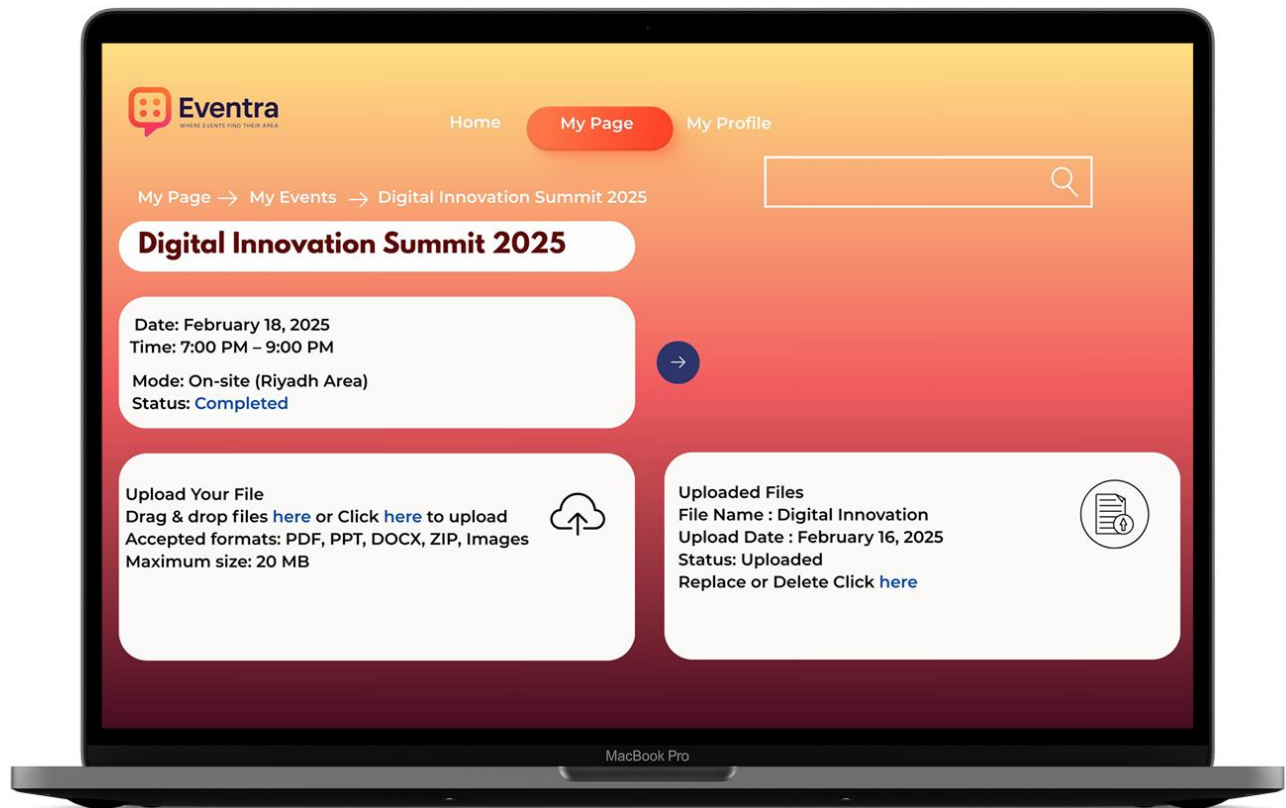

Organizer screen

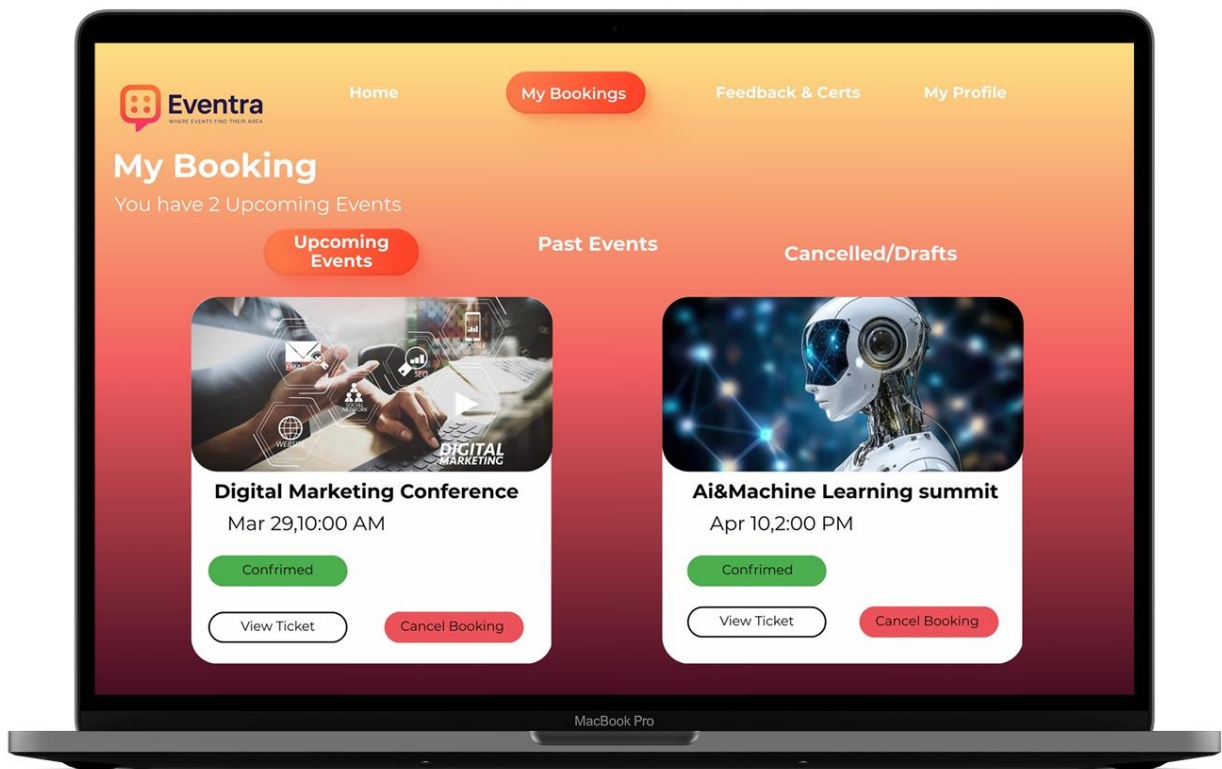

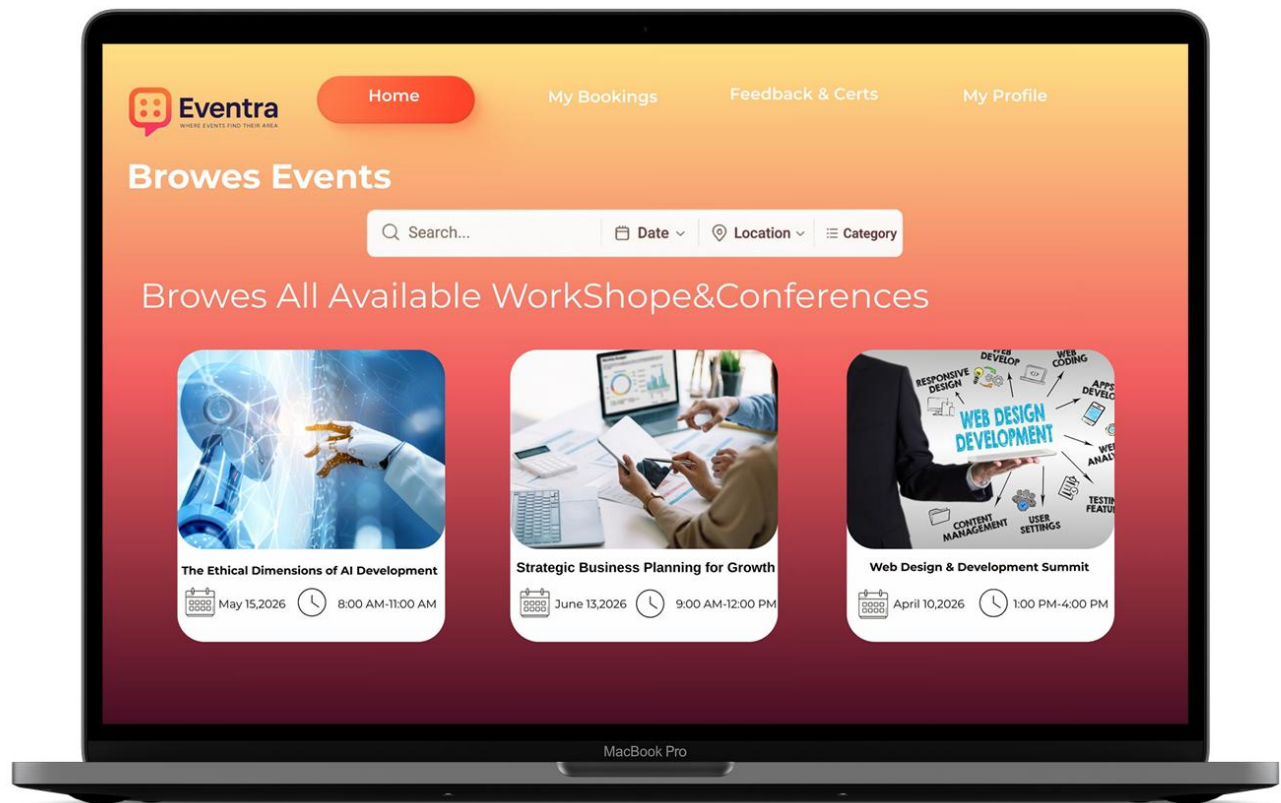

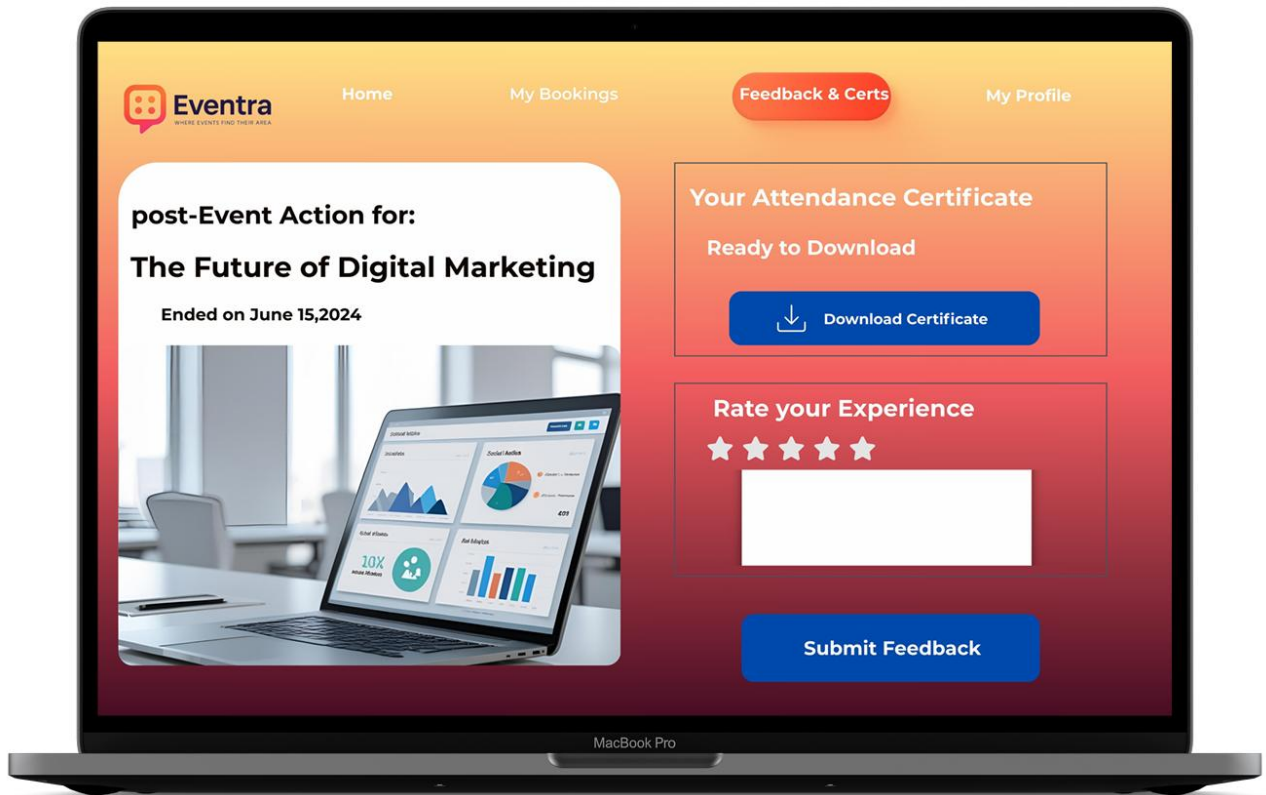

Presenter screen

Participant screen

3.9 design principles

1. Consistency

The interface maintains a consistent structure, layout, and typography across all pages. For example, navigation items such as Home, My Profile, My Events, and My Bookings appear in the same positions repeatedly, and similar sections like event cards, feedback lists, and upload modules follow the same style and spacing rules. This helps users learn the interface quickly and reduces cognitive load.

2. Readability and Navigation

Elements are arranged to guide the user's attention in order of importance. Titles like "Featured Events", "Create Event", and "Digital Innovation Summit 2025" use larger, bolder text, while secondary information such as dates, modes (online/on-site), and statuses (upcoming/completed) appear in smaller typography. Buttons like View Details, Confirm, and Download Certificate stand out clearly to highlight primary actions.

3. Usability and Efficiency (Simplicity – KISS)

The system provides clean, task-focused screens with clear spacing, simple forms, and intuitive labels like "Add Ticket", "Upload Your File", "Rate Your Experience", and "Submit Feedback". This minimizes ambiguity and makes it easy for users—whether organizers or participants—to complete tasks with minimal friction.

4. Visibility with Feedback

The design ensures users always know what is happening by showing clear statuses such as Completed, Upcoming, and Postponed, as well as labels like Uploaded, Confirmed, or Ready to Download across different modules. This follows the usability principle of keeping users informed about system states and the progress of their actions.

5. Simplicity (KISS Principle)

The interface avoids unnecessary decorative elements and focuses on essential components such as event cards, booking lists, and feedback forms. Pages like "Upload Your File" or "Post-Event Actions" show only the necessary inputs and buttons, making the experience clean, focused, and easy to understand.
